

Toss Less

80%

More than 80 percent of Americans discard perfectly good, consumable food simply because they misunderstand expiration labels.

43%

ReFed's research shows that 43% of food wasted by weight occurs at home.

User Research

interviewed 3 users on their purchase behaviors

User Habits

- Buy groceries once or twice a week
- Track freshness by memory or labels
- Most wasted: fresh produce & leftovers

Opportunities

- Want reminders for expiry dates
- Interested in visual tracking or recipe suggestions
- Open to trying an app solution

Pain Points

- Forget what's in the fridge
- Overbuy due to lack of visibility
- Feel guilty when wasting food

User Habits

Persona

Kai Lou Busy Young Professional

📍 Lives in Brooklyn

💼 Works full-time

🏠 Lives alone

🎯 Goals

- Eat healthier and save money
- Waste less food
- Keep groceries organized

😞 Frustrations

- Forgets what's in her fridge
- Feels guilty throwing away good food
- Finds tracking expiration dates inconvenient

👤 Behaviors

- Buys groceries once a week
- Relies on memory, often forgets leftovers
- Uses phone reminders occasionally

"I hate realizing I just threw away something I bought last weekend, it feels like wasting money and effort."

Problem Statement

80% of Americans throw away good food due to label confusion, and 43% of food waste happens at home. Current tracking methods (memory, labels, occasional reminders) are unreliable, causing users to forget what they own, overbuy during their weekly shopping trips, and waste both money and food, leading to guilt and financial loss.

HMW

How might we help households easily track, remember, and use their food before it goes to waste?

About

Home Screen

The home screen displays items that are expiring soon, expired, or newly restocked, along with a dashboard summarizing user behavior and insights.

Detail Page

The detail pages for Expiring Soon, Expired, and New in Stock items show each item's purchase date and expiration (or estimated) date.

In-built detect system

The inbuilt camera detects the item and its expiry date (if available), and allows users to add it to their restock list.

Restock List

Users can add or delete items based on their preferences. Integrated links to Amazon and delivery platforms allow them to restock seamlessly.

Notifications

Usability Test Feedback

Tested 3 users with 2 tasks

Task 1

You just bought groceries. Use the app to add a new item and check if it detects the expiry date correctly.

Task 2

You notice a few items are about to expire. Find where you can view them and restock one through the integrated shopping link.

If you were to design this product, what would you fix or add?

Language & Tone

“Expiring soon” and “Expired” feel negative — prefer phrases like “Use up soon” or “Check your items.”

👉 Use friendlier, action-oriented language to motivate rather than guilt users.

Features

Users want to share accounts with family members to avoid over-purchasing.

👉 Add multi-user or shared household accounts.

User Perception

“Expiring soon” and “Expired” feel negative prefer phrases like “Use up soon” or “Check your items.”

👉 Use friendlier, action-oriented language to motivate rather than guilt users.

Navigation & Customization

“I’d love to have pillars on top of the home screen to check summaries quickly.”
“I would make the homepage customizable.”

👉 Add quick-access summary pillars and allow personalized home layouts.

Thank you
